

How do I arrange an **independent asset inspection** for my Private Sale settlement?

Angle finance is partnered with Verimoto for seamless asset inspections. This report is comprehensive and provides Angle all required information for settlement.

What are your alternatives?

An alternate digital option is Olasio Inspections.

Should your vendor prefer a physical inspection, you may arrange this with Redbook at your clients expense.

If a broker wishes to conduct a physical inspection personally, please refer to MyHub for our Asset Inspection Template.

If you choose one of these options you will be required to also provide:

Vendor ID document
e.g valid AUS drivers licence

Vendor registration papers
or original tax invoice confirming ownership.

Vendor document
for Proof of Bank Account (issued in last 90 days)
